Junior Full Stack Developer focused on Java, Spring Boot, Angular and AWS, with experience building full web applications using decoupled backend architectures, JWT authentication, and REST API consumption.

Experience in real-world projects such as CompraAcá, where I implemented e-commerce features, asynchronous messaging, caching, and AWS deployment, as well as academic systems for internship management at UTN.

I aim to build scalable products with a strong focus on performance, best practices, and user experience.

PROFESSIONAL EXPERIENCE

National Technological University

Mar del Plata

Full Stack Developer

June 2024 - December 2025

- Developed backend features with Spring Boot to digitize internship and job offer management, improving processes within the Student Affairs Department.
- Integrated Google Drive and email services to centralize CVs and improve notification delivery for students and companies.
- Optimized responsive behavior and data management using MySQL, improving accessibility across devices and reducing administrative workload.

Professional reference available upon request · UTN Student Affairs Department, Mar del Plata.

CompraAcá

Mar del Plata

Founder & Full Stack Developer

January 2025 - May 2025

- Built a full stack e-commerce platform using Spring Boot and Angular, implementing JWT authentication, role management, and state handling with NgRx.
- Implemented real-time notifications with SSE, asynchronous processing with RabbitMQ, and caching with Redis, improving performance and scalability under concurrent load.
- Deployed infrastructure on AWS using EC2, RDS, S3, and SES, centralizing storage, database, and email services in a production ready cloud environment.

National Technological University

Mar del Plata

Teaching Assistant (Programming III & IV)

March 2025 - Present

- Assisted students with technical concepts and problem solving in Java, Spring, HTML, CSS, JavaScript, and Angular.
- Delivered practical explanations and walkthroughs of assignments and exercises.
- Evaluated assignments and exams, providing feedback on student performance.

EDUCATION

National Technological University

University Technical Degree in Programming

GPA: 8.95

Mar del Plata

February 2025

ADDITIONAL SKILLS

Tech Stack: Java, Spring, HTML, CSS, JavaScript, Angular, NgRx, PrimeNG, MySQL, Redis, RabbitMQ, Docker, AWS (S3, EC2, SES, RDS).

English: B2 level (Upper intermediate), certified by the First Certificate in English (FCE). Able to communicate fluently and understand complex professional contexts.
